Step 3

**What can be said about step three that the Alcoholics Anonymous book doesn't already cover in such masterly detail? I can say this; no matter how many years go by, no matter how much I grow, and no matter how many thousands of times I read pages 60–63 in our book, I come down with a case of mental gooseflesh every time I read them. To make it even more mind blowing it was suggested to me to read starting with the paragraph which starts out "The first requirement" and read in the first person. Example: Instead of "The first requirement is that we be convinced that any life run on self will can hardly be a success." Read it this way: "The first requirement is that I be convinced that any life run on self will can hardly be a success." Then carry on reading every sentence that way. If you are not convinced it is necessary to turn your will and your life over to the care of God as you understand Him, try this out. If you are like me and if you suffer from what I suffer from, every statement will describe you perfectly and the reason for making the decision will be very clear.**

## Tradition 3

***Tradition 3 of Alcoholics Anonymous holds a special place in my heart, which highlights the essential principle that the only requirement for membership is a desire to stop drinking. This tradition emphasizes inclusivity, affirming that anyone grappling with alcoholism is welcome, irrespective of their background or beliefs.***

# The Enchanted Boulevard of Wall Street.

*Bill's journey led him to the vibrant streets of Wall Street, where he excelled for a period, offering valuable insights within the realm of brokerage. However, amidst his achievements, a shadow lingered—a storm of uncertainties that shrouded his days in a dense fog.*

*Despite the apparent prosperity, it proved to be transient, a mere illusion. As his yearning for more intensified, the fateful year of 1929 arrived, plunging the market into chaos and signaling ominous times ahead. In the waning years of the decade, Bill discerned the gathering storm, forewarning of darker days on the horizon.*

**Few would dispute that the crash of 1929 was the worst in history. Not only did it produce the largest stock market decline; it also contributed to the Great Depression, an economic crisis that consumed virtually the entire decade of the 1930s.**
